2012 European Intelligence and Security Informatics Conference

- Message from the General Chairs
- Message from the Program Co-Chairs
- Organization
- Title Page (Book version)
- Copyright Page (Book version)
- Table of Contents (Book version)
- Author Index (Book version)
- Publisher’s Information (Book version)
sessions

- Keynotes
- Long Papers
- Short Papers
- Posters
- The International Symposium on Open Source Intelligence and Web Mining 2012 (OSINT-WM 2012)
- OSINT-WM 2012 Long Papers
- The Workshop on Innovation in Border Control (WIBC 2012)
- WIBC 2012 Long Papers
- WIBC 2012 Short/Demo Papers
Keynotes

- The Utilization of Forensic Evidence in IED Incidents
  Henry C. Lee
- From Dark Web to GeoPolitical Web: Exploring the Value of Social Media Informatics
  Hsinchun Chen
- OSINT, the Internet and Privacy
  Clive Best
- Detecting Emergent Terrorism Events: Finding Needles in Information Haystacks
  James R. (Bob) Johnson
Long Papers

- Detecting Fraud in Financial Reports
  *D.B. Skillicorn and L. Purda*

- How Transparency Improves the Control of Law Enforcement Authorities’ Activities?
  *Jyri Rajamäki, Jutta Tervahartiala, Sofia Tervola, Sari Johansson, Leila Ovaska, and Paresh Rathod*

- Community of Intelligence: The Secret Behind Intelligence-Led Policing
  *Mariëlle den Hengst and Jan ter Mors*

- Framing the Attacker in Organized Cybercrime
  *Muhammad Adnan Tariq, Joel Brynieldsson, and Henrik Artman*

- SPORS: A Suspect Recommendation System Based on Offenders’ Reconstructed Spatial Profile
  *Richard Frank*

- To Incorporate Sequential Dynamic Features in Malware Detection Engines
  *Mojtaba Eskandari, Zeinab Khorshidpur, and Sattar Hashemi*

- Extracting and Networking Emotions in Extremist Propaganda
  *Travis Morris*
A Computational Model for Predicting the Location of Crime Attractors on a Road Network
   Natalia Iwanski, Richard Frank, Andrew Reid, and Vahid Dabbaghian

Countering Bioterrorism: Why Smart Buildings Should Have a Code of Ethics
   Hervé Borron, Timothy Mitchener-Nissen, Jonathon Taylor, and Ka-Man Lai

Detecting Anomalous Maritime Container Itineraries for Anti-fraud and Supply Chain Security
   Elena Camossi, Tatyana Dimitrova, and Aris Tsois

Exploring a Warrior Paradigm to Design Out Cybercrime
   Mortaza S. Bargh, Sunil Choenni, Ingrid Mulder, and Roland Pastoor

Laundering Sexual Deviance: Targeting Online Pornography through Anti-money Laundering
   Alex Antoniou and Gauri Sinha

How Many Ways Do Offenders Travel—Evaluating the Activity Paths of Offenders
   Richard Frank and Bryan Kinney

Data Mining Applications for Fraud Detection in Securities Market
   Koosha Golmohammadi and Osmar R. Zaiane

A Model for Identity in the Cyber and Natural Universes
   Duncan Hodges, Sadie Creese, and Michael Goldsmith
Mixed Holistic Reductionistic Approach for Impact Assessment of Cyber Attacks
Giusj Digioia, Chiara Foglietta, Stefano Panzieri, and Alessandro Falleni

Identifying Important Nodes in Weighted Covert Networks Using Generalized Centrality Measures
Bisharat Rasool Memon

A Machine Learning Approach to Android Malware Detection
Justin Sahs and Latifur Khan

Measuring Relatedness and Augmentation of Information of Interest within Free Text Law Enforcement Documents
James R. (Bob) Johnson, Anita Miller, Latifur Khan, and Bhavani Thuraisingham

Comparing Methods for Detecting Child Exploitation Content Online
Bryce Westlake, Martin Bouchard, and Richard Frank

Semantic Network Analysis of Islamist Sources Using Time Slices as Nodes and Semantic Similarity as Link Strengths: Some Implications for Propaganda Analysis about Jihad
James A. Danowski

Can Computers Help Us to Better Understand Different Cultures? Toward a Computer-Based CULINT
Danny Livshits, Newton Howard, and Yair Neuman
A Prediction of Terrorist Distribution Range Radius and Elapsing Time: A Case Study in Southern Parts of Thailand
   Athakorn Kengpol and Pakorn Neungrit

Estimating Citizen Alertness in Crises Using Social Media Monitoring and Analysis
   Fredrik Johansson, Joel Brynielsson, and Maribel Narganes Quijano

Analysis of Weak Signals for Detecting Lone Wolf Terrorists
   Joel Brynielsson, Andreas Horndahl, Fredrik Johansson, Lisa Kaati, Christian Mårtenson, and Pontus Svenson

Identifying Distinct Components of a Multi-author Document
   Navot Akiva and Moshe Koppel

Developing a Keystroke Biometric System for Continual Authentication of Computer Users
   John V. Monaco, Ned Bakelman, Sung-Hyuk Cha, and Charles C. Tappert

Dynalink: A Framework for Dynamic Criminal Network Visualization
   Andrew J. Park, Herbert H. Tsang, and Patricia L. Brantingham

Data Base Investigation as a Ranking Problem
   Cor J. Veenman
🌿 Association and Centrality in Criminal Networks
   Rasmus Rosenqvist Petersen

🌿 Analyzing Chat Conversations of Pedophiles with Temporal Relational Semantic Systems
   Paul Elzinga, Karl Erich Wolff, and Jonas Poelmans
Short Papers

- **Behavioral Analysis and Visualization of Fast-Flux DNS**  
  *Andi Fitriah Abdul Kadir, Raja Azrina Raja Othman, and Normaziah Abdul Aziz*

- **Open Source Intelligence in Disaster Management**  
  *Gerhard Backfried, Christian Schmidt, Mark Pfeiffer, Gerald Quirchmayr, Markus Glanzer, and Karin Rainer*

- **Perception in International Conflict: An Agent-Based Approach**  
  *Newton Howard*

- **Al Qaeda Affiliates Operating in Failed States: The Next Front in the War on Terror**  
  *Anthony Celso*

- **Application of Natural Language Processing and Evidential Analysis to Web-Based Intelligence Information Acquisition**  
  *Natalia Danilova and David Stipples*

- **Structured Documents: Signatures and Deception**  
  *Aaron Hunter*
Technologies for Granting Balance between Security and Privacy in Video-Surveillance

Paolo D’Arminio, Ricardo Buendía Iglesias, Janusz Cichowski, Piotr Dalka, Damian Ellwart, Sateesh Pedagadi, James Orwell, Inga Kroener, and Daniel Neyland
Posters

- iCARE: A Scenario-Based Method for the RIBS Project
  Hervé Borrion and Noémie Bouhana

- Resilience of Cyber-Physical System: A Case Study of Safe School Environment
  Jyri Rajamäki, Paresh Rathod, Anu Ahlgren, Johanna Aho, Mari Takari, and Sami Ahlgren

- Information Security Aspects of the 22/7 Attacks
  Hanno Langweg

- Network Intelligence: An Emerging Discipline
  David E.A. Johnson and Newton Howard

- Proactive Digital Forensics: The Ever-Increasing Need for Standardization
  Antonis Mouhtaropoulos, Chang-Tsun Li, and Marthie Grobler

- Pattern Theory in Intelligence Analysis
  Tove Gustavi and Pontus Svenson
The International Symposium on Open Source Intelligence and Web Mining 2012 (OSINT-WM 2012)
OSINT-WM 2012 Long Papers

- The HiTS/ISAC Social Network Analysis Tool
  Hirad Asadi, Christian Mårtenson, Pontus Svensson, and Magnus Sköld

- Detecting Key Players in Terrorist Networks
  Ala Berzinji, Lisa Kaati, and Ahmed Rezine

- Sentiment Network Analysis of Taleban and RFE/RL Open-Source Content about Afghanistan
  James A. Danowski
The Workshop on Innovation in Border Control (WIBC 2012)
  Anthony J. Palmer and Chris Hurrey

Multi-sensor Multi-target Tracking for Infrastructure Protection
  M.V. Moreno, C. Piñana-Diaz, R. Toledo-Moreno, M.A. Zamora, and A. Skarmeta

Predicting Veracity from Linguistic Indicators
  Judee K. Burgoon, Lauren Hamel, and Tiantian Qin

Use of an Automatic Under-Vehicle Inspection System as a Tool to Streamline Vehicle Screening at Ports of Entry and Security Checkpoints
  Erick E. Ruiz and K. Larry Head

Refining Border Security News Event Geotagging through Deployment of Lexico-Semantic Patterns
  Vanni Zavarella, Jakub Piskorski, Ana Sofia Esteves, and Stefano Bucci

Social Simulations for Border Security
  Maciej M. Łatek, Seyed M. Mussavi Rizi, Andrew Crooks, and Mark Fraser
A Comparison of Invasive and Noninvasive Sensors in the Concealed Information Test  
  Jeffrey Gainer Proudfoot, Nathan W. Twyman, and Judee K. Burgoon

Performance and Risk Analysis for Border Management Applications: A Model-Driven Approach and a Perspective View  
  Mayra Sacanamboy, Bojan Cukic, and Vittorio Cortellessa

Benchmark Driven Framework for Development of Emotion Sensing Support Systems  
  Senya Polikovsky, Maria Alejandra Quiros-Ramirez, Yoshinori Kameda, Yuichi Ohta, and Judee Burgoon

Creation of an EU-Level Information Exchange Network in the Domain of Border Security  
  Gregorio Ameyugo, Michal Art, Ana Sofia Esteves, and Jakub Piskorski

The TALOS Project—Autonomous Robotic Patrol Vehicles  
  M. Tanaś, G. Taberski, W. Hołubowicz, K. Samp, A. Sprońska, J. Główka, and M. Maciaś

OptaSense: Fibre Optic Distributed Acoustic Sensing for Border Monitoring  
  Arch Owen, Gregory Duckworth, and Jerry Worsley

W
- Westlake, Bryce
- Wolff, Karl Erich
- Worsley, Jerry

Z
- Zaiane, Osmar R.
- Zamora, M.A.
- Zavarella, Vanni
Ahlgren, Anu
- Resilience of Cyber-Physical System: A Case Study of Safe School Environment

Ahlgren, Sami
- Resilience of Cyber-Physical System: A Case Study of Safe School Environment

Aho, Johanna
- Resilience of Cyber-Physical System: A Case Study of Safe School Environment

Akiva, Navot
- Identifying Distinct Components of a Multi-author Document

Ameyugo, Gregorio
- Creation of an EU-Level Information Exchange Network in the Domain of Border Security
Antoniou, Alex
- Laundering Sexual Deviance: Targeting Online Pornography through Anti-money Laundering

Art, Michal
- Creation of an EU-Level Information Exchange Network in the Domain of Border Security

Artman, Henrik
- Framing the Attacker in Organized Cybercrime

Asadi, Hirad
- The HiTS/ISAC Social Network Analysis Tool

Aziz, Normaziah Abdul
- Behavioral Analysis and Visualization of Fast-Flux DNS
Backfried, Gerhard

- Open Source Intelligence in Disaster Management

Bakelman, Ned

- Developing a Keystroke Biometric System for Continual Authentication of Computer Users

Bargh, Mortaza S.

- Exploring a Warrior Paradigm to Design Out Cybercrime

Berzinji, Ala

- Detecting Key Players in Terrorist Networks

Best, Clive

- OSINT, the Internet and Privacy
Borrion, Hervé
- Countering Bioterrorism: Why Smart Buildings Should Have a Code of Ethics
- iCARE: A Scenario-Based Method for the RIBS Project

Bouchard, Martin
- Comparing Methods for Detecting Child Exploitation Content Online

Bouhana, Noémie
- iCARE: A Scenario-Based Method for the RIBS Project

Brantingham, Patricia L.
- Dynalink: A Framework for Dynamic Criminal Network Visualization

Brynielsson, Joel
- Framing the Attacker in Organized Cybercrime
- Estimating Citizen Alertness in Crises Using Social Media Monitoring and Analysis
- Analysis of Weak Signals for Detecting Lone Wolf Terrorists

Bucci, Stefano
- Refining Border Security News Event Geotagging through Deployment of Lexico-Semantic Patterns

Burgoon, Judee
- Benchmark Driven Framework for Development of Emotion Sensing Support Systems

Burgoon, Judee K.
- Predicting Veracity from Linguistic Indicators
- A Comparison of Invasive and Noninvasive Sensors in the Concealed Information Test
Camossi, Elena

- Detecting Anomalous Maritime Container Itineraries for Anti-fraud and Supply Chain Security

Celso, Anthony

- Al Qaeda Affiliates Operating in Failed States: The Next Front in the War on Terror

Cha, Sung-Hyuk

- Developing a Keystroke Biometric System for Continual Authentication of Computer Users

Chen, Hsinchun

- From Dark Web to GeoPolitical Web: Exploring the Value of Social Media Informatics
Choenni, Sunil
- Exploring a Warrior Paradigm to Design Out Cybercrime

Cichowski, Janusz
- Technologies for Granting Balance between Security and Privacy in Video-Surveillance

Cortellessa, Vittorio
- Performance and Risk Analysis for Border Management Applications: A Model-Driven Approach and a Perspective View

Creese, Sadie
- A Model for Identity in the Cyber and Natural Universes

Crooks, Andrew
- Social Simulations for Border Security
Cukic, Bojan
- Performance and Risk Analysis for Border Management Applications: A Model-Driven Approach and a Perspective View

D’Arminio, Paolo
- Technologies for Granting Balance between Security and Privacy in Video-Surveillance

Dabbaghian, Vahid
- A Computational Model for Predicting the Location of Crime Attractors on a Road Network

Dalka, Piotr
- Technologies for Granting Balance between Security and Privacy in Video-Surveillance
Danilova, Natalia

- Application of Natural Language Processing and Evidential Analysis to Web-Based Intelligence Information Acquisition

Danowski, James A.

- Semantic Network Analysis of Islamist Sources Using Time Slices as Nodes and Semantic Similarity as Link Strengths: Some Implications for Propaganda Analysis about Jihad
- Sentiment Network Analysis of Talibean and RFE/RL Open-Source Content about Afghanistan

den Hengst, Mariëlle

- Community of Intelligence: The Secret Behind Intelligence-Led Policing

Diaz, C. Piñana

- Multi-sensor Multi-target Tracking for Infrastructure Protection
Digioia, Giusj
- Mixed Holistic Reductionistic Approach for Impact Assessment of Cyber Attacks

Dimitrova, Tatyana
- Detecting Anomalous Maritime Container Itineraries for Anti-fraud and Supply Chain Security

Duckworth, Gregory
- OptaSense: Fibre Optic Distributed Acoustic Sensing for Border Monitoring

Ellwart, Damian
- Technologies for Granting Balance between Security and Privacy in Video-Surveillance
Elzinga, Paul
- Analyzing Chat Conversations of Pedophiles with Temporal Relational Semantic Systems

Eskandari, Mojtaba
- To Incorporate Sequential Dynamic Features in Malware Detection Engines

Esteves, Ana Sofia
- Refining Border Security News Event Geotagging through Deployment of Lexico-Semantic Patterns
- Creation of an EU-Level Information Exchange Network in the Domain of Border Security

Falleni, Alessandro
- Mixed Holistic Reductionistic Approach for Impact Assessment of Cyber Attacks
Foglietta, Chiara

- Mixed Holistic Reductionistic Approach for Impact Assessment of Cyber Attacks

Frank, Richard

- SPORS: A Suspect Recommendation System Based on Offenders’ Reconstructed Spatial Profile
- A Computational Model for Predicting the Location of Crime Attractors on a Road Network
- How Many Ways Do Offenders Travel—Evaluating the Activity Paths of Offenders
- Comparing Methods for Detecting Child Exploitation Content Online

Fraser, Mark

- Social Simulations for Border Security

Glanzer, Markus

- Open Source Intelligence in Disaster Management
Główka, J.
- The TALOS Project—Autonomous Robotic Patrol Vehicles

Goldsmith, Michael
- A Model for Identity in the Cyber and Natural Universes

Golmohammadi, Koosha
- Data Mining Applications for Fraud Detection in Securities Market

Grobler, Marthie
- Proactive Digital Forensics: The Ever-Increasing Need for Standardization

Gustavi, Tove
- Pattern Theory in Intelligence Analysis
